

INSTALLATION DIAGRAM FOR
CENTRAL-LOCKING

1. If the car is originally equipped with central-locking system and the driver's door has been installed with electric motor, the wiring can be made on the diagram below: (B, C)

(Figure B positive triggering diagram)

4. When the car is originally equipped with pneumatic central-locking system, the wiring can be made based on the diagram below: (when wiring as per this diagram, please cut off the jumper at the main unit, the central controlling time is 4 seconds)

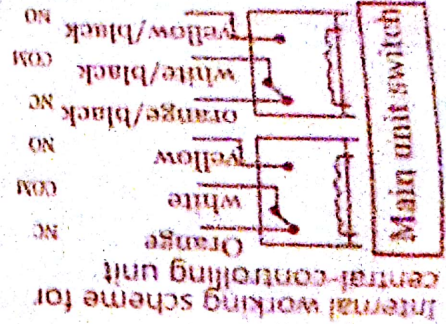

(Figure C Negative triggering diagram)

3. When the car is originally equipped with central-locking system (including in the driver's door), the wiring can be made based on the diagram below: (2)

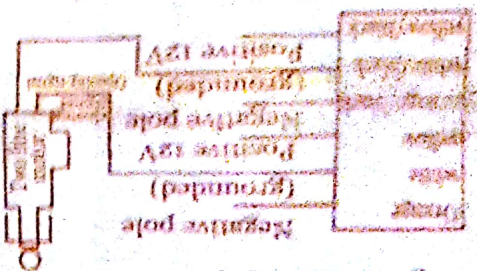

(Figure E wiring diagram for positive electric circuit installation)

(Figure A)

2. When the car is originally equipped with central-locking system and the driver's door is installed with only one switch, then a two wire actuator should be installed, the wiring can be made based on the diagram below: (1)

(Figure D wiring diagram for positive trigger installation)

Keyless Entry System

Operation description

MODEL:LB-405
